### Scouse Nouse

 In July 2008, Cityspace launched Smart Point, its new modular range of interactive touch screen terminals, delivering the widest choice of passenger information services at the point of departure or at interchanges. These terminals deliver real-time travel information and journey planning at the point of need, with interactive touch screens, broadcast services, ticketing, map and timetable panel, help point and illuminated branded panelling. Merseyrail have already ordered several units which will go live this autumn in order to support their need for information, Permit to Travel and security at give unstaffed stations in the Wirral.
