Cityspace to deliver ticketing for Cambridgeshire BRT

Cityspace has been selected by Cambridgeshire Guided Busway in a competitive bid to provide a multi-functional off-bus ticketing network for the BRT project.

Cityspace has developed 17 smart card-enabled, cash and cashless ticketing machines for the ticketing network at stops along the 25 kilometre route linking central Cambridge with St Ives. The machines will set the benchmark as the first off-bus self-service ticketing terminals offering ITSO certified, Oyster-like facilities in the UK.

The Cambridgeshire Guided Busway ticketing project follows Cityspace's selection by Swansea for the passenger information network and content management/delivery of its acclaimed Swansea Metro BRT last month.
